INFINITY O₂
Super-Oxygenated Water

PRODUCT OVERVIEW & DISTRIBUTION

BBI uses a proprietary electrolysis-driven metallurgic process to create InfinityO2 super-oxygenated bottled water.

This process breaks the covalent bonds between oxygen and hydrogen. This is what makes InfinityO2 unique.

InfinityO2 super-oxygenated water gives the consumer a higher level of hydration, energy and wellness in an all-natural drink that tastes much better than the competition and will be marketed to the health conscious consumer segment that is the primary consumer of bottled water.

Retailers are looking for something new that appeals to their mainstream consumers. Distributors are looking for the same thing as retailers. They need to market products that satisfy the needs of their customers.

Super-Oxygenated Water

HISTORY & BEVERAGE OVERVIEW

BIMINI BEVERAGE INC. (BBI), a division of Liquid Prana Corporation, develops and markets ready-to-drink beverages utilizing a groundbreaking technology developed by Liquid Prana Corporation.

BBI implements strategies that focus on the wellness market, and link the sales of its beverages to people of all ages who are looking for an easy way to change to a healthier lifestyle and are searching for an affordable and effective product to increase wellness of life. Our initial product offering, InfinityO2 powered by Liquid Prana technology, is stabilized super-oxygenated bottled water that is imbued with trillions of stable oxygen molecules to give our customers what their body needs.

BBI will position InfinityO2 in the emerging high growth "Oxywater" marketplace. It will be highly differentiated in a beverage category in a beverage category that offers consumers "better for you" beverages. The awareness of the benefits of oxygenated water is growing among consumers and right now the category is wide open, no clear category player has emerged. Retailers are eager for something truly new that they can offer their customers instead of another copycat bottled water drink. BBI will focus exclusively on this market void.

BBI has business relationships with Raley's, Bel Air, and Nob Hill in the Sacramento, California market consisting of 131 stores.

BBI also has a business relationship with John Brooks grocery stores in the Albuquerque, New Mexico market.

MARKETING & SALES PLAN

The BBI marketing plan is focused on achieving the goal on a cost-effective basis. The plan is fully integrated and will be implemented on a grass roots campaign in each of its launch cities. BBI is currently in the process of forging partnerships with local sports teams, and national youth sports organizations to increase brand's visibility.

The marketing plan includes a highly interactive website with links to all social media platforms (Twitter, Facebook, My Space, Blogs) by physicians, clinicians, (Spokespersons and influencers) and local promotions.

The marketing efforts will consist of the following:

- Sampling events where we will utilize product demo sampling events in high-visibility areas.
- Product drops in high-visibility areas.
- Brand ambassadors, including branding, TV exposure, and autograph.
- Sponsorships of sports teams, events and websites including cycling, triathlon, and triathlon marketing.
- Partnerships and public relations with cause-related organizations (American Cancer Society, American Heart Association, etc.)

InfinityO2 will be 15% less than its nearest competition to induce trial.

- \$0.10 per 16.9 ounce bottle (\$0.10 per ounce)
- \$0.09 per 16.9 ounce bottle (\$0.09 per ounce)
